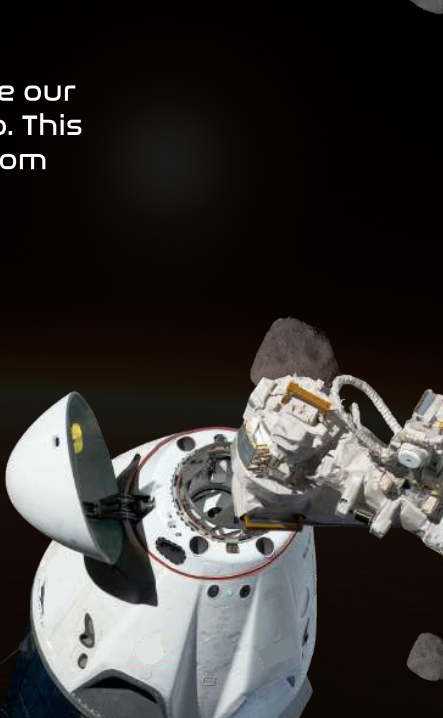
VOYAGER
A Trip to MARS
24.66 EARTH HOURS
2050
Futuristic project
HOME
Hello Sam,
NEXT LAUNCH
21st October 2030

DISCLAIMER

Let's imagine in the future Mars travellers will be our reality and we probably will need the mobile app. This project is about ticket booking app - a travel from Earth to Mars.



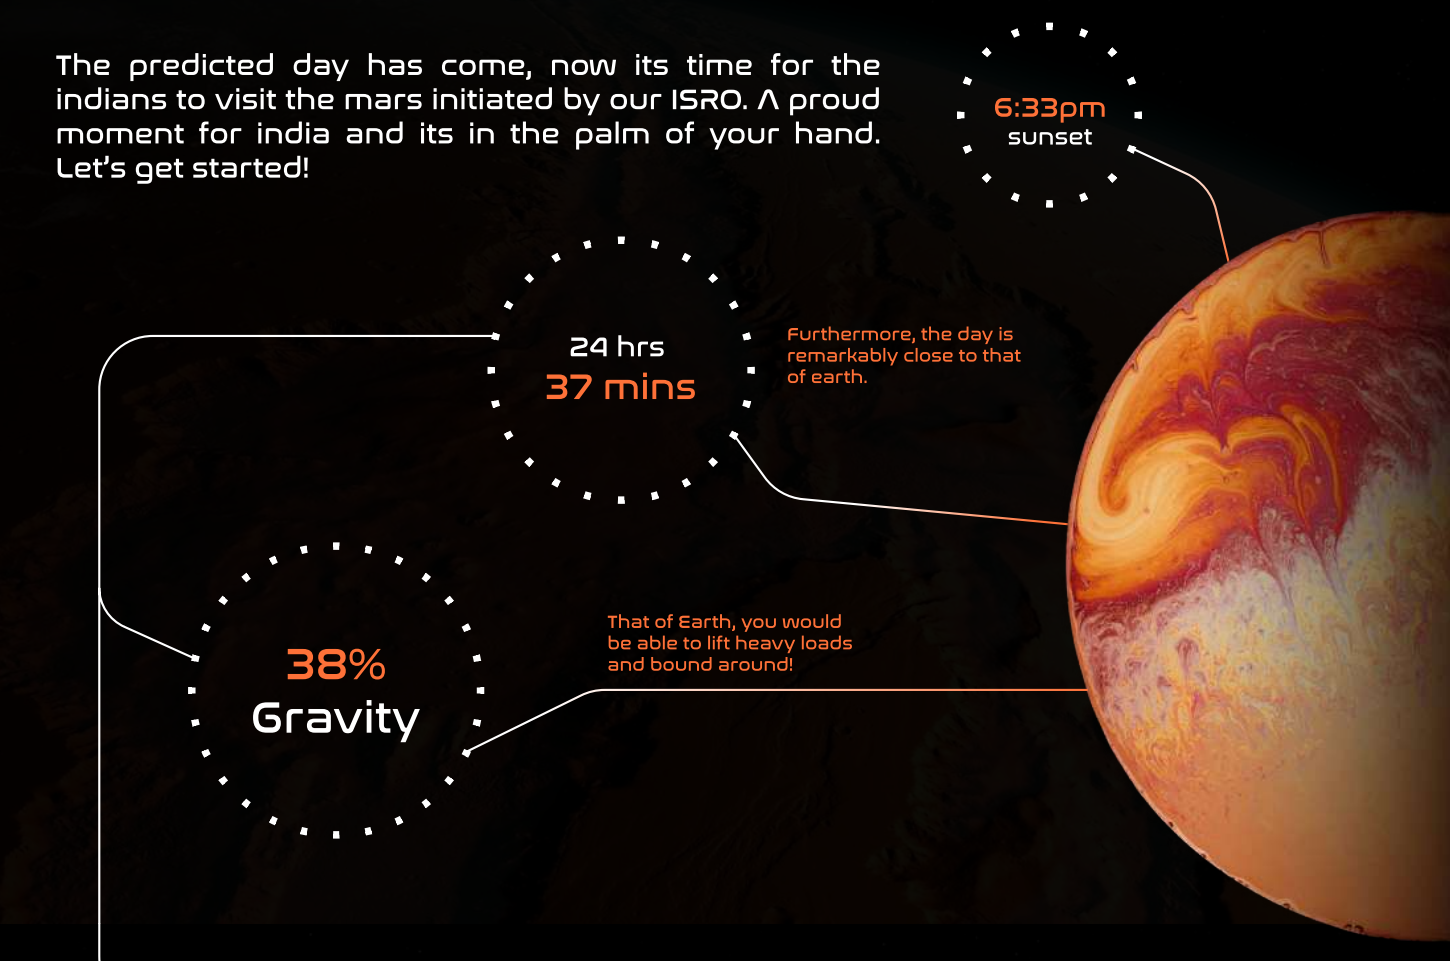
2022 - PAST

A project to MARS revolution was initiated by many private companies with government space agencies. To get into Mars the people has to register their names with the space agencies.

An app for booking tickets for space it doesn't needed. But one day it may.

2050 - PRESENT

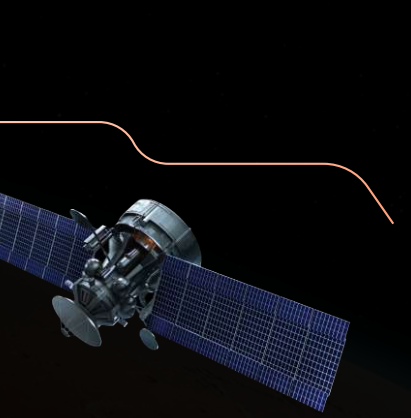
The predicted day has come, now its time for the indians to visit the mars initiated by our ISRO. A proud moment for india and its in the palm of your hand. Let's get started!



6:33pm
sunset
24 hrs
37 mins
Furthermore, the day is remarkably close to that of earth.
38%
Gravity
That of Earth, you would be able to lift heavy loads and bound around!

PROJECT CHALLENGE

My task was to create a convenient and user-friendly app for choosing and ordering the tickets, seeing some space news, available tours etc.,



THE BUILT OF VOYAGER

Based on the research data which collected from various mediums like Nasa reports, blogs about the initiative of mars mission etc., Collected latest informations about mars and applied it effectively.

PROJECT TIMELINE

RESEARCH
DAY 01 - 5 hours

- Compared various research datas, determined user base.
- Collected Live mars datas and read blogs about future spacecrafts.

WIREFRAME
DAY 02 - 8 hours

- From the collected datas, I created voyager visually with a clear understanding of UI and navigation process.
- Organized datas, ticket booking system and a little bit imagination - inside view of futuristic spacecraft.

HI-FI DESIGN
DAY 03 - 6 hours

- Converted the mid-fidelity to high-fidelity was a challenge.
- My goal was to develop intuitive and consistent navigation design process, engaging and personalized user experience.

RECOLLECT

CHALLENGES

I challenged myself on developing a project within three days and it should be 'Out of the box'. Upon thinking, I asked myself, why it can't be 'Out of the world'.

There started this 'VOYAGER', but initially I don't know anything about space, even it's a mini-project, I have to give my full research support.

The datas are collected from various blogs, NASA's live updates which is mixed with a little-bit of my imagination.

WHAT I LEARNT

To give the best as a designer when you design an 'EXPERIENCE'.

More important to understand thoroughly the idea that you're working on.

"ALWAYS GIVE YOUR FULLEST, EVEN IT'S A TINY PRODUCT"

THANK YOU
FOR YOUR TIME
